Research Interests

Computer Architecture and Systems, Security, Memory Systems, and AI/ML, with specific emphasis on the following areas:

- **Memory Security:** Enhancing the security and reliability of memory systems by uncovering fundamental vulnerabilities such as RowHammer, Denial-of-service (DoS), and timing side channels, and developing efficient and low-overhead mitigation mechanisms. I am also interested in extending these efforts to emerging memory technologies such as CXL and processing-in-memory (PIM) architectures.
- **AI/ML Security:** Investigating security risks in machine learning systems stemming from system and hardware level vulnerabilities. My research examines threats such as side channel leakage from system level optimizations (e.g., speculative decoding) and vulnerabilities in large language models (LLMs), and develops principled defenses to address them.
- **Systems for ML:** Advancing the efficiency of machine learning inference through architectural and systems-level optimizations, including speculative decoding and adaptive batching mechanisms.

Education

The University of British Columbia (UBC)

Vancouver, BC, Canada

Ph.D. in Electrical and Computer Engineering — *Sep. 2022 - May. 2026 (Expected)*

- Advisor: Prof. Prashant Nair
- **Dissertation: Secure and Low-Overhead RowHammer Mitigations for Scalable Memory Systems**
- GPA: 4.00/4.00

Hanyang University (HYU)

Seoul, South Korea

M.S. in Electronics and Computer Engineering — *Mar. 2018 - Feb. 2020*

- Advisor: Prof. Ki-Seok Chung
- **Dissertation: Row-hammering Mitigation Architecture for High Reliable DRAM**
- GPA: 4.00/4.00

Hanyang University (HYU)

Seoul, South Korea

B.S. in Electronic Engineering — *Mar. 2012 - Feb. 2018*

- Advisor: Prof. Ki-Seok Chung
- **Dissertation: Implementation of an FPGA-based CNN Accelerator using SDSoC**
- GPA: 3.89/4.00 **(Graduating with Honors - Summa Cum Laude)**

Publications

Preprints and In Submission

[P.1] Zachary Coalson, **Jeonghyun Woo**, Chris S. Lin, Joyce Qu, Yu Sun, Shiyang Chen, Lishan Yang, Gururaj Saileshwar, Prashant J. Nair, Bo Fang, Sanghyun Hong. **"PrisonBreak: Jailbreaking Large Language Models with at Most Twenty-Five Targeted Bit-flips"**. *In submission at the 35th USENIX Security Symposium **(USENIX Security'26)***. 2025. **[Arxiv]**

Conference Publications

[C.5] **Jeonghyun Woo**, Joyce Qu, Gururaj Saileshwar, and Prashant Nair. **"When Mitigations Backfire: Timing Channel Attacks and Defense for PRAC-Based Rowhammer Mitigations"**. *In 52nd Annual International Symposium on Computer Architecture **(ISCA'25)***. June 2025. (Acceptance Rate: 23.1%). **[Paper] [Code] [Slides]**

[C.4] **Jeonghyun Woo**, Shaopeng (Chris) Lin, Prashant Nair, Aamer Jaleel, and Gururaj Saileshwar. **"QPRAC: Towards Secure and Practical PRAC-based Rowhammer Mitigation using Priority Queues"**. *In 31st International Symposium on High-Performance Computer Architecture **(HPCA'25)***. Mar. 2025. (Acceptance Rate: 21.0%). **[Paper] [Code] [Slides]**
[Distinguished Artifact Award]

[C.3] **Jeonghyun Woo** and Prashant Nair. **"DAPPER: A Performance-Attack-Resilient Tracker for RowHammer Defense"**. *In 31st International Symposium on High-Performance Computer Architecture **(HPCA'25)***. Mar. 2025. (Acceptance Rate: 21.0%). **[Paper] [Slides]**

[C.2] Jeonghyun Woo, Gururaj Saileshwar, and Prashant Nair. **"Scalable and Secure Row-Swap: Efficient and Safe Row Hammer Mitigation in Memory Systems"**. *In 29th International Symposium on High-Performance Computer Architecture **(HPCA'23)***. Feb. 2023. (Acceptance Rate: 25.0%). **[Paper] [Code] [Slides]**
[Best Paper Award: One of Two Best Papers in 364 Submissions]

[C.1] Kwangrae Kim, Jeonghyun Woo, Junsu Kim, and Ki-Seok Chung. **"HammerFilter: Robust Protection and Low Hardware Overhead Method for RowHammer"**. *In 39th International Conference on Computer Design **(ICCD'21)***. Oct. 2021. (Acceptance Rate: 24.4%). **[Paper] [Slides] [Video]**

Workshop Publications and Posters

[W.3] Chris S. Lin, Jeonghyun Woo, Prashant J. Nair, Gururaj Saileshwar. **"CnC-PRAC: Coalesce, not Cache, Per Row Activation Counts for an Efficient in-DRAM Rowhammer Mitigation"**. *Fifth Workshop on DRAM Security **(DRAMSec'25)** co-located with **ISCA 2025***. June 2025. **[Paper]**

[W.2] Shih-Lien Lu, Jeonghyun Woo, Prashant J. Nair. **"Counterpoint: One-Hot Counting for PRAC-Based RowHammer Mitigation"**. *Fifth Workshop on DRAM Security **(DRAMSec'25)** co-located with **ISCA 2025***. June 2025. **[Paper]**

[W.1] Kwangrae Kim, Junsu Kim, Jeonghyun Woo, and Ki-Seok Chung. **"HammerFilter: Robust Protection and Low Hardware Overhead Method for Row-Hammering"**. *Work-in-Progress (WIP) poster in 58th Design Automation Conference **(DAC'21)***. Dec. 2021. **[Poster]**

Domestic (Korean) Conference Publications

[D.2] Jeonghyun Woo and Ki-Seok Chung. **"A Method to Find the Optimal Probability for Probability-driven Additional Row Refresh to Prevent DRAM Row Hammering"**. *In The Korean Institute of Communications and Information Sciences Winter Conference*. Jan. 2019.

[D.1] Changwoo Lee*, Jeonghyun Woo*, Sang-Soo Park, and Ki-Seok Chung. **"Implementation of an FPGA-based CNN Accelerator using SDSoC"**. *In The Korean Institute of Communications and Information Sciences Fall Conference*. Nov. 2017. (*Equal Contribution). **[Code: 300+ Stars]**
[Outstanding Paper Award]

Honors and Awards

2023	**HPCA 2023 Best Paper Award** → One of Two Best Papers in 364 Submissions	*Canada*
2025	**HPCA 2025 Distinguished Artifact Award**	*USA*
2025	ISCA Student Travel Grant	*Japan*
2023, 2025	HPCA Student Travel Grant	*Canada and USA*
2022-2024	Faculty of Applied Science Graduate Award, University of British Columbia (UBC) → $16,600 CAD in Total	*Canada*
2018-2019	Hanyang Graduate School Scholarship → 70% of Tuition (≈ $9,200 CAD per Year)	*South Korea*
2016, 2017	Hanyang Academic Excellence Award → Top 1% ranked in University (≈15,000 Students)	*South Korea*
2016	Hanyang Academic Excellence Award → Top 3% ranked in University (≈15,000 Students)	*South Korea*
2016-2017	Hanyang Alumni Association Scholarship → Full Tuition (≈$10,000 CAD per Year)	*South Korea*
2016	Excellent Tutor Award in Engineering Mathematics Tutoring Program, Hanyang University (HYU)	*South Korea*
2012-2013	Hanyang University Scholarship → Full Tuition (≈$10,000 CAD per Year)	*South Korea*

Experience

Systems and Architectures (STAR) Lab, The University of British Columbia (UBC) — *Vancouver, BC, Canada*
Graduate Research Assistant — *Sep. 2022 - Present*
- Advisor: Prof. Prashant Nair
- Conducting research on computer architecture, security, memory systems, and AI/ML.

The University of British Columbia (UBC) — *Vancouver, BC, Canada*
Graduate Teaching Assistant — *Sep. 2022 - Present*
- Computer Architecture (CPEN 411): Fall 2022, Fall 2023, and Fall 2024
- Digital Systems and Microcomputers (CPEN 312): Spring 2025

Architecture Research Group (ARG), NVIDIA Research — *Westford, MA, USA*
Research Intern — *May. 2024 - Aug. 2024*
- Manager: Dr. David Nellans and Mentor: Dr. Aamer Jaleel
- Explored secure and low-overhead Per Row Activation Counting (PRAC)-based RowHammer mitigations.

Vertical Systems Research (VSR), Micron Technology — *Folsom, CA, USA*

Sytems Research Engineering Intern — *May. 2023 - Aug. 2023*

- Manager: Ameen Akel and Mentor: Dr. Chun-Yi Liu
- Explored RowHammer solutions for future High-Bandwidth Memory (HBM).

Systems Platform Research Group, University of Illinois Urbana-Champaign (UIUC) — *Champagin, IL, USA*

Graduate Research Assistant — *Aug. 2020 - Jan. 2021*

- Advisor: Prof. Jian Huang
- Investigated integration of Non-Volatile Memory (NVM) into programmable switches and GPUs.

Embedded System on Chip (ESoC) Lab, Hanyang University (HYU) — *Seoul, South Korea*

Graduate Research Assistant — *Mar. 2018 - Feb. 2020*

- Advisor: Prof. Ki-Seok Chung
- Proposed reliable and low-overhead mechanisms for RowHammer mitigation and retention-aware refresh in highly scaled DRAMs.
- Implemented an FPGA-based Foveated Rendering decoder using Verilog for an industry-funded project with LG Display.

Hanyang University (HYU) — *Seoul, South Korea*

Graduate Teaching Assistant — *Mar. 2018 - Dec. 2019*

- VLSI Engineering (ELE 3081): Fall 2019
- SoC Design (ITE 4003): Spring 2018

Teaching and Mentoring Experience

Teaching Experience

Computer Architecture (CPEN 411) — *University of British Columbia (UBC)*

Teaching Assistant — *2022 - 2024*

- Led labs/tutorials, implemented auto graders for assignments, held office hours, and graded exams and assignments.

Digital Systems and Microcomputers (CPEN 312) — *University of British Columbia (UBC)*

Teaching Assistant — *Jan. 2025 - Apr. 2025*

- Led labs, held office hours, and graded exams and assignments.

VLSI Engineering (ELE 3081) — *Hanyang University (HYU)*

Teaching Assistant — *Sep. 2019 - Dec. 2019*

- Led labs, held office hours, and graded exams and assignments.

SoC Design (ITE 4003) — *Hanyang University (HYU)*

Teaching Assistant — *Mar. 2018 - Jun. 2018*

- Developed lab assignments on Altera FPGA boards, led labs, and graded exams and assignments.

Mentoring Experience

Junsu Kim — *University of British Columbia (UBC)*

Ph.D. Student — *Jan. 2020 - Current*

- Mentored undergraduate research on RowHammer security, first presented as a Work-in-Progress poster at **DAC'21** and later published at **ICCD'21**.
- Currently mentoring Ph.D. research on efficient LLM inference.

Kwangrae Kim — *Hanyang University (HYU)*

Ph.D. Student — *Jan. 2019 - Dec. 2021*

- Guided Ph.D. research on RowHammer security, initially presented as a Work-in-Progress poster at **DAC'21** and subsequently published at **ICCD'21**.

Talks

June. 2025	**When Mitigations Backfire: Timing Channel Attacks and Defense for PRAC-Based RH Mitigations**, ISCA'25	*Tokyo, Japan*
Mar. 2025	**QPRAC: Towards Secure and Practical PRAC-based Rowhammer Mitigation using Priority Queues**, HPCA'25	*Las Vegas, USA*
Mar. 2025	**DAPPER: A Performance-Attack-Resilient Tracker for RowHammer Defense**, HPCA'25	*Las Vegas, USA*
Aug. 2024	**Towards Secure and Low-Overhead PRAC-Based RowHammer Mitigations**, End-of-Intern Talk at NVIDIA	*Westford, USA*
Aug. 2023	**RowHammer Mitigations for Future High-Bandwidth Memory**, End-of-Intern Talk at MICRON	*Folsom, USA*
Feb. 2023	**Scalable and Secure Row-Swap: Efficient and Safe Row Hammer Mitigation in Memory Systems**, HPCA'23	*Montreal, Canada*
Nov. 2017	**Implementation of an FPGA-based CNN Accelerator using SDSoC**, KICS'17 Fall Conference	*Daegu, South Korea*

Academic Service

Program Committee Member

- 2026 IEEE International Symposium on High-Performance Computer Architecture (HPCA 2026)

Artifact Evaluation Committee Member

- 2025 IEEE International Symposium on Workload Characterization (IISWC 2025)

Invited Reviewer

- IEEE Transactions on Very Large Scale Integration (VLSI) Systems (TVLSI) 2025

Student Volunteer

- SPICE Workshop Co-Located with MICRO 2025
- 2024 IEEE International Symposium on Workload Characterization (IISWC 2024)
- 2023 International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS 2023)

Academic Projects

Investigating the Potential of Data Compression for Optimized LLC Replacement

Advanced Computer Architecture

The University of British Columbia (UBC), Instructor: Prof. Mieszko Lis — *Jan. 2023 - Apr. 2023*

- Conducted a comprehensive evaluation of existing LLC replacement methods to assess their effectiveness and limitations.
- Demonstrated 72.7% of cache lines are compressible by 10B or more, showing the potential of using compression for better replacement policies.
- Proposed a preliminary compression-assisted replacement method to optimize performance while minimizing storage overhead.

Revisiting Address Translation on Intel Optane DC PMEM using Big-Memory Applications

Graduate Operating Systems

The University of British Columbia (UBC), Instructor: Prof. Margo Seltzer — *Sep. 2022 - Dec. 2022*

- Quantified address translation overhead in Optane DC PMEM systems using graph processing, HPC, and genomics workloads.
- Showed significant overhead with 4KB pages and demonstrated huge pages reduce overhead for applications sized tens of GB.

Implementing Forward Operation of a Modified LeNet-5 in CUDA

Applied Parallel Programming

University of Illinois at Urbana-Champaign (UIUC) — *Nov. 2020 - Dec. 2020*

- Implemented five optimized forward-pass of convolutional layers using CUDA by leveraging shared memory, constant memory, and loop unrolling.
- Performed performance analysis with GPU performance profiling tools Nsight-Systems and Nsight-Compute.
- Source Code: https://github.com/jeonghyunwoo0306/ece408PJ_Fa2020

32-Bit 5-Stage Pipelined MIPS Processor

Computer Architecture

Hanyang University (HYU) — *Apr. 2016 - Jun. 2016*

- Implemented a 32-bit 5-stage pipelined MIPS processor using Verilog.
- Performed an FPGA demonstration on Xilinx ZedBoard.

8-Bit LCD Password Timer

Microprocessor

Hanyang University (HYU) — *Nov. 2013 - Dec. 2013*

- Implemented an 8-bit LCD password timer using Assembly Language.

Skills

Programming Languages C/C++, Python, Perl, CUDA, Verilog, Bash Script, Assembly Language, Go
Simulators Ramulator, ChampSim, Gem5, DRAMSim2, GPGPU-Sim, MGPUSim
Tools Pin, SimPoint, Xilinx Vivado, Xilinx SDSoC, Intel Quartus

Relevant Coursework

- Advanced Computer Architecture, UBC
- Graduate Operating Systems, UBC
- Applied Parallel Programming, UIUC
- SoC Design, HYU
- Embedded System Design, HYU
- VLSI Engineering, HYU
- Computer Architecture, HYU
- Operating Systems, HYU
- Microprocessor, HYU
- Data Structures, HYU
- Digital Logic Design, HYU
